1949 19.4140 Wild burro vs. mountain sheep. *In:* Letters [SECTION]. *Desert Magazine*, 13(1) (November): 30. [Letter in response to Randall Henderson's column in the October issue, which pertained to Death Valley. Goodwin's letter notes: "The decision by the National Park Service to attempt to hold the number of burros to a point where they would not threaten the sheep is far from being a new angle. Grand Canyon had to face it a number of years ago and carried on a very quiet campaign with the permission of all Human Societies and Wildlife experts and while I do not have the number of burros that were actually done away with, I know it ran into considerable figures. Lake Mead is faced with the same problem at this time." (ENTIRE NOTE)]

1913 19.778 *Our vanishing wild life : its extermination and preservation.* New York: New York Zoological Society, 411 pp. [See pp. 339 (map), and 343: "The Grand Canyon National Game Preserve of northern Arizona, embraces the entire Grand Canyon of the Colorado River, for a meandering distance of 101 miles, and adjacent territory to an extent of 2,333 square miles (1,492,928 acres). Owing to certain conditions, natural and otherwise, it is not the finest place in the world for the peaceful increase of wild game. The Canyon contains a few mountain sheep, and mule deer, but Buckskin Mountain, on the northwestern side, is reeking with mountain lions and gray wolves, and both those species should be shot out of the entire Grand Canyon National Forest. It was on Buckskin and the western wall of the Canyon itself that 'Buffalo' Jones, Mr. Charles S. Bird, and their party caught nine live mountain lions, in 1909. [¶]I regret to say that 'Buffalo' Jones's catalo experiment on the Kaibab Plateau seems to have met an untimely and disappointing fate. For three years the bison and domestic cattle crossed, and produced a number of cataloes; but in 1911, practically the whole lot was wiped off the earth by cattle rustlers! Mr. Jones thinks that it was guerrillas from southern Utah who murdered his enterprise, partly for the reason that no other persons were within striking distance of the herd." (ENTIRE NOTE)]

2007 19.2861 New records of sucking lice (Phthiraptera: Anoplura) from the western United States. *Journal of Vector Ecology*, 32(2) (December): 366-370. [Includes records from Kaibab Plateau and other locales on the Arizona Strip.]

Küchler, A. W., AND McCormick, Jack

1971 19.889 (COMPILERS) *Vegetation maps of North America* (International Bibliography of Vegetation Maps [A. W. Küchler, ed.], Volume 1). Naarden: Anton W. Van Bekhoven, 453 pp.

Kuhnt, P., AND Reineck, G.

1908 19.6189 Aus den Sitzungen. I. *Deutsche Entomologische Zeitschrift*, 1908(2) (March 1): 282-293. [See p. 28: "Horn zeigt eine *Amblychila*-Larve (wahrscheinlich *A. Schwarzi*: Peach Spring, Arizona: Ch. Fuchs) von 28 mm Länge, die sich von den G. Hornschen Angaben (Tr. Am. Ent. Soc. 1876) vor allem durch das Vorhandensein von jederseits 2 Augen unterscheidet." It is not clear to which paper by George H. Horn in the 1876 *Transactions of the American Entomological Society* is referred; Peach Spring (Peach Springs) is not noted in any of them. However, "The Sexual Characters of North American Cicindelidæ with Notes on Some Groups of *Cicindela*" (pp. 232-240, Plate I) includes *Amblychila* Say (pp. 233-234). Plate I in this volume is not called out in any paper therein; it does, however, include "Fig. 18.—Hind trochanter and last ventral ♂ and ♀ of *Amblychila*." Thus it is to this paper that Kuhnt and Reineck seem to have referred, although the absence of specific information as noted by them is a matter not resolved here. The specific epithet, *schwarzi*, pertains to *A. schwarzi* Walther

Hermann Horn, 1903. The genus is correctly *Amblycheila* Say, 1830; *Amblychila* is an unjustified emendation by Agassiz, 1846.] [In German.]

Le Conte, John L.[79]

1876 19.6017 (WITH George H. Horn) The Rhynchophora of America, North of Mexico. *American Philosophical Society, Proceedings*, 15(96) (December): i-xvi, 1-442 [entire number]. [*NOTE*: Cited here with question. Le Conte (p. 364) named the new species *Tomicus confusus* based on three specimens from "Southern California and Arizona"; no further information relating to the type localities is known. Swain (1924, ITEM NO. 19.6018) selected Le Conte's "California" specimen, in the Agassiz Museum, Harvard University, as the type for *Ips confusus* (Le Conte); he selected the "Arizona specimen" as the holotype of *Ips lecontei*, new species. Inasmuch as the genus represents forest beetles, it is not likely that the California specimen came from a locality pertaining to the lower Colorado River region as defined in this bibliography (thus neither Le Conte nor Swain are cited in Part 11, Section 1). However, the genus is widely distributed, including the Grand Canyon region and higher elevations of Arizona, and although it is less likely that Le Conte's specimen is from the immediate Grand Canyon region, both Le Conte's and Swain's papers are cited here conditionally.]

≡ CROSS-LISTINGS FQ19:375

Lowers, H. A.; Lankton, J.; AND Hinck, J. E.

2017 19.5854 Lung bioassay of ground dwelling mammals from the Grand Canyon uranium breccia pipe region using scanning electron microscopy [ABSTRACT]. *In: 14th Biennial Conference of Science and Management for the Colorado Plateau and Southwest Region, September 11-14, 2017, High Country Conference Center, Northern Arizona University, Flagstaff, Arizona.* [No imprint], p. 95.

Lowry, J.; Ramsey, R. D.; Thomas, K.; Schrupp, D.; Sajwaj, T.; Kirby, J.; Waller, E.; Schrader, S.; Falzarano, S.; Langs, L.; Manis, G.; Wallace, C.; Schulz, K.; Comer, P.; Pohs, K.; Rieth, W.; Velasquez, C.; Wolk, B.; Kepner, W.; Boykin, K.; O'Brien, L.; Bradford, D.; Thompson, B.; AND Prior-Magee, J.

2007 19.2815 Mapping moderate-scale land-cover over very large geographic areas within a collaborative framework: A case study of the Southwest Regional Gap Analysis Project (SWReGAP). *Remote Sensing of Environment*, 108(1): 59-73.

Luce, Robert J.

2006 19.6408 Areas where habitat characteristics could be evaluated to identify potential black-footed ferret reintroduction sites and develop conservation partnerships. *In:* Roelie, James E., Miller, Brian J., Godbey, Jerry L., and Biggins, Dean E. (eds.), Recovery of the black-footed ferret: Progress and continuing challenges : proceedings of the symposium on the Status of the Black-footed Ferret and its Habitat, Fort Collins, Colorado, January 28-29, 2004. *U.S. Geological Survey, Scientific Investigations Report 2005-5293*, pp. 69-88. [Existing reintroduction sites include Aubrey Valley, Arizona.]

Luce, Robert J., AND Keinath, Doug

2007 19.3067 *Spotted bat (*Euderma maculatum*): A technical conservation assessment; prepared for the USDA Forest Service, Rocky Mountain Region, Species Conservation Project.* [No imprint], 51 pp. [Includes notes on Grand Canyon and Kaibab Plateau occurrences.]

Lukowski, Susan

1981 19.6505 NPS video technology applications endless. *Courier* (U.S. National Park Service), 4(6) (June): 7. ["Portable [video tape units], according to Grand Canyon's Resource Management Chief, Jim Walters, 'has been terrific for situations like bringing the impact of burro damage directly to public meetings.' The 10-minute unedited black and white tape Walters shot from a small patrol plane 'did much to help the viewers understand Grand Canyon's problems.'" (ENTIRE NOTE)]

Lupher, M. L., AND Clarkson, R. W.

1994 19.3165 Temperature tolerance of humpback chub (*Gila cypha*) and Colorado squawfish (*Ptychocheilus lucius*) [ABSTRACT]. *Desert Fishes Council, Proceedings*, 25: 38.

Lupoli, C. A.; Sabo, J. L.; Kennedy, T. A.; Muehlbauer, J. D.; AND Yackulic, C. B.

2017 19.5855 Hydropower and the aquatic-terrestrial dynamic along the Colorado River [ABSTRACT]. *In: 14th Biennial Conference of Science and Management for the Colorado Plateau and Southwest Region, September 11-14, 2017, High Country Conference Center, Northern Arizona University, Flagstaff, Arizona.* [No imprint], p. 95.

Lusher, Jeremy, AND Uberuaga, David

2015 19.4865 Data driving decisions about fire management [ABSTRACT]. *In: 13th Biennial Conference of Science and Management on the Colorado Plateau and Southwest Region, October 5-8, 2015, Northern Arizona University, High Country Conference Center : oral and poster abstracts*, p. 56. [Grand Canyon National Park.]

Lüthy, Johnas M.

1999 19.4934 Einige neue Kakteennamen. *Kakteen und andere Sukkulenten* (Deutsche Kakteen-Gesellschaft; Gesellschaft Österreichischer Kakteenfreunde; Schweizerische Kakteen-

Gesellschaft), 50(11): 277-280. [See p. 278, *Pediocactus peeblesianus* (Croizat) L. D. Benson subsp. *fickeiseniae* (Backeberg ex Hochstäter) Lüthy.] [In German.] [*NOTE*: The basionym *Navajoa peeblesiana* Croizat var. *fickeisenii* Backeberg ex Hochstätter, and other names earlier than Lüthy's, are not valid names by the Code of Botanical Nomenclature. The type locality, unspecific, is on the north side of Grand Canyon.]

Lutz, Alwine, AND Lutz, Eberhard

1989 19.6110 Zu den Kakteenstandorten im Westen der USA. Reisebericht in zwei Teilen; Teil 2. *Kakteen und andere Sukkulenten* (Deutsche Kakteen-Gesellschaft; Gesellschaft Österreichischer Kakteenfreunde; Schweizerische Kakteen-Gesellschaft), 40(6) (June): 138-141. [Cactus hunting; includes note of House Rock Valley and Lees Ferry area. Part 1 is not pertinent to this bibliography.] [In German.]

1990 19.6051 Reiseeindrücke vom Arizona-Strip. *Kakteen und andere Sukkulenten* (Deutsche Kakteen-Gesellschaft; Gesellschaft Österreichischer Kakteenfreunde; Schweizerische Kakteen-Gesellschaft), 41(1) (January): 11-13. [Cactus hunting on the Arizona Strip.] [In German.]

Lutz, Frank E.

1934 19.938 From low to high. *Grand Canyon Nature Notes*, 9(7) (October): 327-329. [Insect collecting at mouth of Bright Angel Creek, Indian Garden, and Supai. A general article without specifics.]

Ottley, Alice M.

1944 19.2117 The American Loti with species consideration of a proposed new section, Simpeteria. *Brittonia*, 5(2) (September 8): 81-123. [See: ***Lotus utahensis* Ottley, new species** (pp. 108-109), type from "west of Carmel, Utah"; specimens examined include "MOHAVE: Mocaic Pass, *Edw. Palmer 93* (NY in 1877. This is not conspecific with *Palmer 94*, US 23791, which is Rydberg's type of *Lotus longebracteatus*). COCONINO: s. of Jacob's Lake, Kaibab Forest, *Ferguson & Ottley 5568* (Wel); 34 mi. n. of Canyon Lodge [*i.e.*, Grand Canyon Lodge], yellow pine and fir association, 8950 ft. alt., *Ferguson & Ottley 5578* (Wel) ; rocky hillside, yellow pine association, north rim of Grand Canyon, *Ferguson & Ottley 5571* (Wel, a possible contamination with *L. Wrightii*). YUMA: (?) Buckskin Mountains, 9000 ft. alt., *M. E. Jones 6052g*, Sept. 17, 1894 (US, Cla with no number)." (Ottley adds the following footnote regarding the "Yuma County" record: "I have been unable to determine from a perusal of Jones' account of his collection of 1894 given in the *Contributions to Western Botany*, No. 7, 1895, whether or not the Buckskin Mountains where he collected on Sept. 15, 17, 18, 20, and 21 are in Yuma County, Arizona. The only mountains of that name that we find on the maps are in that county, but they are considerably farther south than any of the other localities for *L. utahensis*. We doubt if the Yuma County mountains are the ones to which Jones refers, especially since he was collecting near Carmel, Utah, on Sept. 13 and on Sept. 16 and 23 at or near Springdale, Utah." [Accordingly, this record, particularly given its 9000-ft altitude, must refer to the Kaibab Plateau.]) See also ***Lotus wrightii* (Gray) Greene** (pp. 113-115), which includes the following material examined: "COCONINO . . . Colorado Plateau, Grand Canyon, *L. Ward*, June 9, 1901 (US); in open forest of *Pinus ponderosa*, *Artemisia tridentata*, and *Bouteloua gracilis*, 9 mi. s. of Grand Canyon, *H. M. Hall*, Sept. 27, 1920 (Berk); 5 mi. e. of El Tovar Hotel, Grand Canyon, 7200 ft. alt., *Ferguson & Ottley 4997* (Wel); 1 mi. w. of Grand View Point, 7400 ft. alt., *Ferguson & Ottley 4998* (Wel); rim of Grand Canyon, *A. Hitchcock*, July 1, 1915 (US); Grand Canyon, *V. Rattan*, July, 1912 (Cla, Wel); in pine forest, ibid., 7000 ft. alt., *E. C. Jaeger*, Aug., 1923 (Cla); Kaibab Forest, *E. C. Jaeger* (Cla 160123); roadside bank, north rim, Grand Canyon, 8400 ft. alt., *Ferguson*

& Ottley 5570, prostrate to erect (Wel); Kaibab National Forest, Grand Canyon, 2100-2500 m. alt., *Eggleston 10219* (US); common, pine forest, vicinity of Jacob's Lake, 7509 ft. alt., *Maguire & Maguire 12262* (Ut); yellow pine association, Jacob's Lake, 7500 ft. alt., *Cottam 2637* (By); 3 mi. n. of Jacob's Lake, 8100 ft. alt., *Ferguson & Ottley 5581*, not quite typical, may have a trace of *L. utahensis* (Wel). MOHAVE: dry hills, oak association, Mt. Dellenbaugh [Shivwits Plateau], 7000 ft. alt., *Cottam 4155* (By); dry hills, oak association, w. of Mt. Dellenbaugh, 5800 ft. alt., Cottam 4169 (By)". See also ***L. rigidus* × *wrightii*** (pp. 115-116) with the following specimens examined: "MOHAVE: 6 mi. n. of Wolf Hole, 4900 ft. alt., *S. B. Benson 51* (Berk); Peach Springs, *M. E. Jones*, May 26, 1884 (Cla 28289); *M. E. Jones*, [see Ottley footnote] May 26, 1884 (Cla 28292, 28283); Truxton Canyon, *Peebles & Kearney 11298* (US); Hackberry, *M. E. Jones*, May 26, 1884 (Ja). (The footnote just mentioned reads: " It would appear probable from the date that the specimens were collected either in the vicinity of Peach Springs or of Hackberry.") See also ***L. utahensis* × *wrightii*** (p. 116) with the following specimens examined: "COCONINO: eight mi. n.w. of Jacob's Lake, Kaibab Forest, *F. W. Peirson 7366* (Cla); under yellow pines, 8 mi. n.w. of Jacob's Lake, 7825 ft. alt., *Ferguson & Ottley 5582* (Wel); Jacob's Lake, 8200 ft. alt., *Ferguson & Ottley 5580* (Wel); Kaibab Forest, e. of Jacob's Lake, 7800 ft. alt., *Ferguson & Ottley 5566* (Wel); Kaibab Forest, *E. C. Jaeger*, July 7, 1927 (Cla 159618); Grand Canyon, *M. V. Walcott* in 1935 (US)." Rehn, James A. G., AND Hebard, Morgan

1908 19.1385 An orthopterological reconnoissance of the southwestern United States. Part I: Arizona. *Academy of Natural Sciences of Philadelphia, Proceedings*, 60: 365-402. [See locality descriptions, pp. 367-368. See: ***Litanutria skinneri* Rehn** (p. 370), "A male specimen from the Grand Canyon, altitude 7,000 feet, September 11, 1907." ***Paropomala perpallida* new species** (pp. 373-375, figures 5, 6); "Type: ♂; near Bright Angel Trail, elevation 3,750 feet, Grand Canyon of the Colorado, Coconino County, Arizona. September 12, 1907. Collected by M. Hebard." ***Syrbula modesta* Bruner** (pp. 375-376); "This rather diminutive species was taken at elevations ranging from 4,900 to 5,800 feet in the Grand Canyon, three males and two females being included in the series." ***Amphitornus nanus*, new species** (pp. 376-378, figure 7); "Type: ♂; Grand Canyon of the Colorado, Coconino County, Arizona, altitude 7,000 feet, in conifer forest. September 11, 1907. Collected by Morgan Hebard." ***Dissosteira carolina* (Linnæus)**; "Three males and two females of this widely distributed species were taken at Williams, September 13, while a single female was taken September 11 at Bright Angel, Grand Canyon, elevation of 6,850 feet." ***Trimerotropis modesta* Bruner** (p. 390); "A female of this form taken on the rim of the Grand Canyon, near Bright Angel, September 11, and a male taken at Williams, September 13, are in the collection. The specific validity of this form appears to be rather questionable, as its relationship to *T. citrina* is so close that it may be nothing more than a race of that species." ***Trimerotropis inconspicua* Bruner** (p. 390); "Three males of this species taken at Bright Angel, Grand Canyon, 6,880 feet to 7,000 feet, are before us. Two were taken July 29 to August 2, 1906, by Calvert, and one on September 11, 1907, by Hebard." ***Trimerotropis vinculata* Scudder** (pp. 390-391); "This wide ranging species is represented by eighty-three specimens taken as follows: . . . Bright Angel Trail, Grand Canyon, elevation 3,000-7,000 feet, July 29-August 2 (Calvert), September 11 and 12 (Hebard), 3 ♂, 9 ♀." ***Trimerotropis cyaneipennis* Bruner** (p. 391); "A series of sixteen males and seven females of this species was taken at elevations ranging from 3,800 to 7,000 feet on and in the vicinity of the Bright Angel Trail, Grand Canyon, September 11 and 12. [. . .] It was not plentiful along the canyon edge, but lower on the Bright Angel Trail it was found almost everywhere, most plentiful, however, about bare places near precipices." ***Circotettix undulatus* (Thomas)** (pp. 391-392); "A series of seven males and nine females taken near the rim of the Grand Canyon at Bright Angel represents this species. Two males and three females were taken July 29 to August 2, 1906, by Calvert, and the remainder September 11, 1907, by Hebard." ***Melanoplus aridus* (Scudder)** (pp. 396-397); "A very interesting series of this species was taken at localities in northern Arizona, a region from which it was previously not reported. [. . .] a series of fourteen males and eleven females from the riin of the Grand Canyon at Bright Angel, September 11, are very decidedly smaller than Scudder's measurements, some specimens being hardly more than half the size given by him. [. . .] at Grand Canyon it was the most abundant species of Orthoptera and was found everywhere in the undergrowth of the heavier pine woods." ***Melanoplus femur-nigrum* Scudder** (p. 397); "This little known species is represented by a series of two males and three females taken September 11 at the rim of the Grand Canyon at Bright Angel." ***Melanoplus canonicus* Scudder** (pp. 397-398); "A series of two males and seven females. taken September 12 along or near the Bright Angel Trail, Grand Canyon, represent this species. These specimens were taken at altitudes ranging from 4,850 to 6,800 feet, one female alone being from above an elevation of 5,800 feet. [. . .] In size there is considerable variation in the series, all being smaller than Scudder's original measurements." ("***Œcanthus niveus* (DeGeer)"** (p. 402); "A single male of this species was taken near Bright Angel Trail, Grand Canyon, at an elevation of about 4,900 feet, September 12. ("***Œcanthus nigricornis* Walker**" (p. 402); "A single male from the rim of the Grand Canyon at Bright Angel, September 11, is referred tentatively to this species." [See also Rehn and Hebard (1912, ITEM NO. 19.1386) for lectotypifications of selected species.]

St. John, Harold

1941 19.2160 Revision of the genus *Swertia* (Gentianaceae) of the Americas and the reduction of *Frasera*. *American Midland Naturalist*, 26(1) (July): 1-29. [See *Swertia utahensis* (M. E. Jones) comb. nov. (pp. 12-13, square brackets are part of the quotation): "None of the large eastern American herbaria consulted contained the type material: M. E. Jones, June 19, 1890, on the Buckskin Mountains (Kaiba Plateau), on the southern edge of Utah. Dr. P. A. Munz has kindly loaned three pertinent sheets from the Jones herbarium at Pomona College. They are all of this species, F. utahensis Jones, are collected on June 18, 1890. Two are from Jacob's Pools, Ariz., and one from House Rock, Ariz., this latter being marked 'Type material.' It will be seen that this wording is for a different state as well as locality and day. How ever, it is on the Kaiba [or Kaibab] Plateau, and the Arizona-Utah state boundary crosses in this vicinity. These Jones collections are not numbered, and there seems to be a confusion between the written and the published data. This is not the first time that such confusion has been found in Jones' collections. Hence, it is reasonable to accept the sheet so marked as the type, as it conforms well to the diagnostic characters given in the original description. The type locality would then be: Arizona, House Rock, June 18, 1890, Marcus E. Jones (Herb. Pomona). There is an isotype in the herbarium of the University of California, at Berkeley."]

[80] Many early issues of *Grand Canyon Nature Notes* include hand-drawn cover art signed "ES", which appeared until the death of Ranger-Naturalist Glen Sturdevant, it is very likely that the artist was Eileen Fourcade (Mrs. Glen) Sturdevant, who had signed an early work "EFS", but inasmuch as the initials can also be confused with contemporary Ranger-Naturalist E. T. Scoyen, specific credits are omitted in this bibliography for now. *(E.E.S., March 2017.)*

≡ REVIEWS AND NOTICES Lawton, 2023, ITEM NO. 30.1633; Lindley, 2023, ITEM NO. 30.1651; White, 2023, ITEM NO. 30.1669 *NEW YORK TIMES*: Blum, 2023, ITEM NO. 3.1999

[*BIBLIOGRAPHICAL NOTE*: In 2023, Amazon.com promoted a title, *Summary of Brave the Wild River*, which was only a contrived "summary and analysis" of the book, perhaps produced with the use of Artificial Intelligence software. Two items were seen in November 2023; one by "Ben Isaac", with a cover photo of two young women sitting on a wall alongside an undefined riparian stream (certainly neither the Colorado River nor the Grand Canyon), the other, with no cover illustration, by "John L. Lemon". The first title advertises in broken English, "This is not a book by Melissa L. Sevignys nor is it affiliated with them. It is an independent publication that summarizes Sevigny's book in details." The second title, in similarly broken English, advertises, "This is an independent publication by John L. Lemon that summarizes Melissa L. Sevigny's book in details[.] The contents of the outline is never to supplant the original book but rather to help readers figure out a smart read. This outline has been approximately created nailing down the fundamental central issues and realities, and summoned to assist developing comprehension you might intrepret the book." A Kindle electronic tablet version attributes the author as "LIFE Summary" and adds to the unillustrated title image, "(A guide to Melissa L. Sevigny book)"; it also noted (citing a different "author"): "Disclaimer!! This is not a book by Melissa L. Sevigny, nor is it affiliated with them. It is an independent publication by Nora Alonzo that summarizes Melissa L. Sevign's book in detail. It is a summary. The contents of the outline are never to replace the original book but rather to help readers figure out a smart read. This outline has been approximately created nailing down the fundamental central issues, and realities, and summing up subtleties to assist in developing comprehension you might interpret the book." Such productions are not cited in this bibliography, but this note is added here as a matter of contemporary bibliography focusing on one conventionally published title. Note the various attributed authors and similar (though not perfectly identical) disclaimers. This bibliographical note also serves as a cautionary example of what probably are artificially produced texts that may be of interest to human who will research the evolution of AI, a technology that demonstrably can do terrible disservice to works that are more rigorous, human-guided surveys (not to overlook the intents and intellectual rights of the original authors!).]

Swain, J. M.

1924 19.6018 The allies of *Ips confusus* Lec. in western America; Family Ipidae, Coleoptera. *Canadian Entomologist*, 56(3) (March): 69-72. [*NOTE*: Cited here with question. Le Conte (1876, ITEM NO. 19.6017), p. 364, named the new species *Tomicus confusus* based on three specimens from "Southern California and Arizona"; no further information relating to the type localities is known. Swain (pp. 69-70) selected Le Conte's "California" specimen, in the Agassiz Museum, Harvard University, as the type for *Ips confusus* (Le Conte); he selected the "Arizona specimen" as the holotype of *Ips lecontei*, new species. Inasmuch as the genus represents forest beetles, it is not likely that the California specimen came from a locality pertaining to the lower Colorado River region as defined in this bibliography (thus neither Le Conte nor Swain are cited in Part 11, Section 1). However, the genus is widely distributed, including the Grand Canyon region and higher elevations of Arizona, and although it is less likely that Le Conte's specimen is from the immediate Grand Canyon region, both Le Conte's and Swain's papers are cited here conditionally.]

1925 19.6643 Thrills of an Eastern ornithologist in the West. *Bird-Lore*, 27(5) (September/October): 310-314. [See p. 311, ". . . I saw groups of [pygmy nuthatches] of 100 or more in the forests on the brim of the Grand Canyon. They were of diminutive size and most attractive, both in voice and action, with sweet and gentle twittering notes, undulatory flight, and most diligent in exploration, especially in the tufts of pine needles in which they almost disappeared." Also p. 312, "A Rosy Finch—a popular name much to be preferred to Leucosticte—was indeed a thrill at the rim of the Grand Canyon, for it had never been recorded for Arizona before, but, in a heavy snowstorm, I saw four Black Rosy Finches feeding unsuspiciously in the snow. Their striking black and gray and rosy plumage and their yellow bills with black tips made them well-marked, attractive, and easily identified birds." (ENTIRE NOTES)]

1966 19.6315 Plant material introduced January 1 to December 31, 1957 (Nos. 236143 to 244732). *U.S. Department of Agriculture, Plant Inventory No. 165* (Washington, D.C.), 416 pp. [See No. 241055, seed of *Enneapogon desvauxii* Beauv., "11 miles east of Jacob Lake, Kaibab, Coconino County, Arizona." (p. 219).]

1968 19.6316 Plant material introduced January 1 to December 31, 1964 (Nos. 294439 to 303627). *U.S. Department of Agriculture, Plant Inventory No. 172* (Washington, D.C.), 369 pp.

---

[82] The citations for the Department of Agriculture's "Plant Inventory Books" relates to what is now the U.S. National Plant Germplasm System, information about which is a part of the Germplasm Resources Information Network (GRIN). For access to the inventory books go to https://www.ars.usda.gov/northeast-area/beltsville-md-barc/beltsville-agricultural-research-center/national-germplasm-resources-laboratory/docs/plant-inventory-books/ (last accessed 9 January 2022). Each plant inventory book properly may be credited to different compilers; however, a bibliographical decision is made here to group all of the citations from the inventory books under the governmental source. They are listed in this bibliography under (chronologically ordered), "U.S. Department of Agriculture, Bureau of Plant Industry", "U.S. Department of Agriculture", and "U.S. Bureau of Agriculture, Agricultural Research Service". Although there are some significant hiatuses in the time of publication for inventory lists covering earlier years, the apparent significant hiatuses expressed by the citations here are due to the lack of seeds or plants credited to sources that lie within the geographical bounds of this bibliography. Plant Inventory Books 1-217 (1898-2008) have been examined.

2013 19.4038 Endangered and Threatened Wildlife and Plants; Designation of Critical Habitat for the Acuña cactus and the Fickeisen plains cactus. *Federal Register*, 78(130) (July 8): 40673-40686. [Fickeisen plains cactus, *Pediocactus peeblesianus* var. *fickeiseniae*, at various locales in Grand Canyon region. Includes maps.]

U.S. Fish and Wildlife Service, Southwest Region, Ecological Services offices, Staff

2009 19.6556 Endangered and Threatened wildlife and plants; partial 90-day finding on a petition to list 475 species in the southwestern United States as Threatened or Endangered with Critical Habitat. *Federal Register*, 74(240) (December 16): 66866-66905. [Notice of 90-day petition finding.]

U.S. Fish and Wildlife Service, Upper Colorado River Office, Endangered Fish Recovery Program

2020 19.6380 Endangered and Threatened wildlife and plants; reclassification of the humpback chub from Endangered to Threatened with a Section 4(d) rule. *Federal Register*, 85(14) (January 22): 3586-3601. [Proposed rule.] [*Gila cypha*.]

2021 19.6644 Endangered and Threatened wildlife and plants; reclassification of the razorback sucker from Endangered to Threatened with a Section 4(d) rule. *Federal Register*, 86(127) (July 7): 35708-35728. [Proposed rule.] [*Xyrauchen texanus*.]

2021 19.6671 Endangered and Threatened wildlife and plants; reclassification of the humpback chub from Endangered to Threatened with a Section 4(d) rule. *Federal Register*, 86(198) (October 18): 57588-57610. [Final rule.] [*Gila cypha*.]

U.S. Fish and Wildlife Service, Utah Ecological Services Field Office

2020 19.6372 Endangered and Threatened wildlife and plants; removing the Kanab ambersnail from the list of Endangered and Threatened wildlife. *Federal Register*, 85(3) (January 6): 487-492. [Proposed rule.] [*Oxyloma haydeni kanabensis*.]

2021	19.6645	Endangered and Threatened wildlife and plants; removing the Kanab ambersnail from the list of Endangered and Threatened wildlife. *Federal Register*, 86(119) (June 24): 33137-33142. [Final rule.] [*Oxyloma haydeni kanabensis*.]

U.S. Fish and Wildlife Service, Utah Field Office, Ecological Services

2011	19.5489	*Kanab ambersnail :* Oxyloma haydeni kanabensis *: 5-year review: summary and evaluation.* West Valley City, Utah: U.S. Fish and Wildlife Service, Utah Field Office, Ecological Services, 26 pp.

U.S. Forest Service

1964	19.3449	*Trees of the forest : their beauty and use.* U.S. Forest Service.
1967	19.4568	*Trees of the forest : their beauty and use.* U.S. Forest Service, slightly revised, 25 pp. (U.S. Forest Service, Program Aid 613.)
1970	19.3450	*Trees of the forest : their beauty and use.* U.S. Forest Service, slightly revised, 25 pp.
1973	19.3700	*Forest Service research accomplishments/1973.* U.S. Forest Service. [See p. 15: "230. Silviculture control practices have reduced the level of dwarf mistletoe and protected the ponderosa pine recreation forest on the South Rim of Grand Canyon. Plots studied for 20 years document that periodic sanitation in an effective control for dwarf mistletoe in high-use recreation sites. Sanitation has forestalled mortality and associated vegetative changes along the South Rim, thereby sustaining scenic and esthetic values provided by ponderosa pine." GCES

GLEN CANYON ENVIRONMENTAL STUDIES PROGRAM

Glen Canyon Environmental Studies program technical reports and related documents produced under the monitoring and research programs of the Glen Canyon Dam Environmental Impact Statement as mandated by Congress

[This part of the bibliography is complete and is no longer updated, the GCES program having ended. Continued research is under the auspices of the U.S. Geological Survey, Grand Canyon Monitoring and Research Center.]

PART 20. GLEN CANYON ENVIRONMENTAL STUDIES PROGRAM

OVERVIEW. The Glen Canyon Environmental Studies (GCES) program, based in Flagstaff, Arizona, was created to perform as an interagency body under the direction of the U.S. Department of the Interior, Bureau of Reclamation. It responded to a Congressional mandate to develop an Environmental Impact Statement on the effects of hydropower production at Glen Canyon Dam on the Colorado River and its riparian community downstream through lower Glen Canyon, Marble Canyon, and the Grand Canyon. The EIS also examined the potential impacts of management decisions on social and economic issues. The GCES went through two phases—1982–1988 and 1990–1996. Research functions were thereafter continued by the U.S. Geological Survey, Grand Canyon Environmental Research Center in Flagstaff, Arizona.

GCES was such an important part of the scientific and cultural study of the Grand Canyon, specifically in the previously little-studied Colorado River corridor, that the products of these studies are a bibliography in their own right. Many of the documents are interdisciplinary, thus also a justification for listing them separately, rather than in several places throughout this bibliography. Historians of science will also notice in this list that some of the subjects were reported in other scientific publications. A few of the reports were also released in their entirety as U.S. Geological Survey Open-File Reports or publications of the National Academy Press; these are itemized here. Most of the reports listed here, and voluminous supporting data, are accessible at the Grand Canyon Monitoring and Research Center, Flagstaff, Arizona (http://www.gcmrc.gov/library/).

Glen Canyon Environmental Studies Reports

***Compiled by* Richard D. Quartaroli** [85]

Glen Canyon Environmental Studies
U.S. Bureau of Reclamation
Flagstaff, Arizona

Phase I (1982–1988)

Phase II (1990–1996)

In Part 20, ITEM NUMBERS that follow the sequence of citation numbering for this bibliography are listed for bibliographical convenience only. They do not necessarily pertain to individual reports; some refer to study groups, various reports of which are archived now in the Grand Canyon Monitoring and Research Center, Flagstaff, Arizona. Various legacy and newer reports are accessible online through https://www.usgs.gov/centers/southwest-biological-science-center/science/grand-canyon-monitoring-and-research-center

The layout presented in this part has been adjusted for greater clarity.

B. Arizona Game and Fish Department

Native Fish Studies in the Mainstem Colorado River and in the Little Colorado River

B1	**Ecosystem Level Process and Lower Trophic Level**	
B1(1)	20.45	***Effects of different flow regimes on primary production and organic matter and nutrient loading rates and budgets for the Glen Canyon Dam tailwater to Lee’s Ferry.***
B1(2)	20.46	**_Effects of operations of Glen Canyon Dam on the_ Gammarus lacustris _in the Glen Canyon Dam tailwater._**
B1(3)	20.47	***Effects of varying flow levels on the algal and invertebrate species of the Glen Canyon Dam tailwater.***
B1(4)		***Effects of varying flow levels on desiccation and nutritive quality of the exposed algae.*** Principal Investigators: Dennis Kubly, Andy Ayers, Ted Angradi
	20.48	Draft — 30 September 1993
	20.49	Final — 31 December 1993

B2 Interim Flow Monitoring

		Effects of the interim flows on the water chemistry and aquatic food base for Lake Powell and in the Lee's Ferry tailwater. Principal Investigator: William Persons
	20.50	Draft — 30 September 1994
	20.51	Final — 31 December 1994

B3 Trout Studies

B3(1)	20.52	***Effects of the operations of Glen Canyon Dam on the loss of trout spawning in the reach between Glen Canyon Dam and Lee's Ferry.***
B3(2)	20.53	***Effects of the operations of Glen Canyon Dam on the rate of stranding and mortality of naturally reproduced and stocked trout from Glen Canyon Dam to Lee's Ferry.***
B3(3)	20.54	***Effects of fluctuating flows on the age and growth relationships of stocked trout between Glen Canyon Dam and Lee's Ferry.***
B3(4)		***Effects of fluctuating flows on the behavioral response of trout in the Glen Canyon Dam tailwater.*** Principal Investigators: William Persons, Dennis Kubly
	20.55	Draft — 30 September 1993
	20.56	Final — 31 December 1993

B4 Native Fish Studies

B4(1)	20.57	***Identify the temporal and spatial distribution patterns and movements of early life history stages of fishes in the Little Colorado River.***
B4(2)	20.58	***Determine changes in environmental conditions in mainstream and tributary confluence areas for native fish rearing habitats under different flow regimes.***
B4(3)	20.59	***Determine the algal and invertebrate standing crops and their relative contributions to the diets of young native fish.***
B4(4)	20.60	***Determine the behavioral responses of larval to juvenile native fishes to changing environmental conditions in rearing habitats.***
B4(5)	20.61	***Determine the age structure and growth rates of native fishes related to hydrologic and thermal conditions.***
B4(6)	20.62	***Comparison of otolith edge chemistry of native fishes collected in tributary and mainstream habitats for use in growth and movement analysis.*** Principal Investigators: Dennis Kubly, Rob Clarkson
B4(7)	20.63	***Determination of the effects of limnological changes on the distribution of native fishes in the Little Colorado River and other tributaries.*** Principal Investigator: Rob Clarkson

B4(8) ***Determination of thermal tolerance of young-of-the-year humpback chub.***
Principal Investigator: William Persons

20.64 Draft — 30 September 1994

20.65 Final — 30 November 1994

B5 Propagation of Native Fish Study

Propagation of native fish for studies in the Grand Canyon. Protocol report.
Principal Investigator: William Persons

20.66 Draft — 30 January 1993

20.67 Final — 30 November 1993

E. U.S. Geological Survey, Arizona District Office and National Research Program

E1 Eddy Deposition Study

Movement and deposition of sediments from the main channel to the eddies of the Colorado River in the Grand Canyon.
Principal Investigators: Jon Nelson, Ned Andrews

20.79 Draft — 31 March 1993 (anticipated)

20.80 Final —

E2 Velocity Field Simulations

***Simulation of the velocity fields of the Colorado River in the Grand Canyon, Arizona* (preliminary title)**
Principal Investigators: James Smith, *et al.*

20.81 Draft — 30 June 1993

20.82 Final —

E3 Beach and Eddy Linkage

Linkage in the main channel and eddy dynamics of the flow of the Colorado River in the Grand Canyon, Arizona.
Principal Investigators: James Smith, *et al.*

20.83 Draft — 30 June 1993

20.84 Final —

E4 Sediment Transport Simulations

***Sediment transport simulations, Colorado River, Grand Canyon, Arizona*.**
Principal Investigator: Jim Bennett [James P. Bennett]

20.85 Draft — 31 March 1993

20.86 Final —

E5 Water Quality Characteristics of Lake Powell

Water quality characteristics of the Lake Powell forebay and draft tubes of Glen Canyon Dam.
Principal Investigators: Robert Hart, K. M. Sherman

20.87 Draft — 31 March 1993

20.88 Final —

E6 **Channel Margin Stratigraphy**

Internal structure of bars in Grand Canyon and evaluation of proposed alternatives for Glen Canyon Dam.
Principal Investigators: Dave Rubin, *et al.*

20.89 Draft — 31 March 1993

20.90 Final —

E7 **Sediment Transport Study**

Flow and sediment transport in the Colorado River between Lake Powell and Lake Mead.
Principal Investigators: Jim Smith, Steve Wiele

20.91 Draft — 31 March 1993

20.92 Final —

E8 **Beach Deformation Study**

Hydrogeology of sand bars 43.1L and 172.3L and the implications on flow alternatives along the Colorado River in Grand Canyon.
Principal Investigators: Michael Carpenter, Carruth, Fink,Boling, Brian Cluer

20.93 Draft — 30 June 1993

20.94 Final —

E9 **Debris Flow Study**

Magnitude and frequency data for debris flows in Grand Canyon National Park and vicinity, Arizona.
Principal Investigators: Ted Melis, Robert Webb

20.95 Draft — 30 September 1993

20.96 Final —

E10 **Synoptic Water Quality Report**

Synoptic water-quality experiments on the Colorado River in the Grand Canyon, Arizona.
Principal Investigators: Robert Averett, H. E. Taylor

20.97 Draft — 31 March 1993

20.98 Final —

E11 Sand Thickness in Grand Canyon

Measurement of sand thickness in Grand Canyon and a conceptual model for characterizing changes in sand-bar volume through time and space.
Principal Investigators: Dave Rubin, *et al.*

20.99 Draft — 31 March 1993

20.100 Final —

E12 Stanton Photo Reevaluation

A century of environmental changes in Grand Canyon: Repeat photography of the 1889-90 Stanton Expedition on the Colorado River.
Principal Investigator: Robert Webb

20.101 Draft — 30 June 1993

20.102 Final — 30 September 1993

E13 Paria River Flood and Sediment Relationships

Relation of sediment load and flood-plain formation to climatic variability, Paria River drainage basin, Utah and Arizona.
Principal Investigators: Julia Graf, Robert Webb, Richard Hereford

20.103 Draft — 31 December 1992

20.104 Final —

E14 Traveltime and Dispersion

Traveltime and longitudinal dispersion at steady and unsteady flows, Colorado River, Glen Canyon Dam to Lake Mead.
Principal Investigator: Julia Graf

20.105 Draft — 31 March 1993

20.106 Final —

F. U.S. Geological Survey, Geomorphic and Geologic Analysis in Support of the Cultural Resource Program

F1 Geoarchaeology and Mapping

Surficial geology, geomorphology, AND erosion of archaeologic sites along the Colorado River, eastern Grand Canyon, Grand Canyon National Park, Arizona.
Principal Investigators: Richard Hereford, Helen Fairley, Kate Thompson, Jan Balsom

20.107 Draft — 30 September 1993

20.108 Final — 31 December 1993

F2 Historic Climate Condition

Historic variation of warm-season rainfall, southern Colorado Plateau, southwestern U.S.A.: Climate change.
Principal Investigators: Richard Hereford, Robert Webb

20.109 Draft — 31 December 1992

20.110 Final —

F3 Geologic Report

Quaternary geology, geomorphology, and erosional processes in the eastern Grand Canyon.
Principal Investigator: Ivo Lucchitta

20.111 Draft — 30 September 1993

20.112 Final — 20 December 1993

G. HBRS, Inc.

Recreation and Economics Reports

G1 Recreation Studies

20.113 ***Evaluation of the recreation economic impact related to the operations of Glen Canyon Dam.***
Principal Investigators: Michael Welsh, Richard Bishop

G2 Non-Use Value Studies

Evaluation of the non-use values of the Grand Canyon as related to the operations of Glen Canyon Dam.
Principal Investigators: Michael Welsh, Richard Bishop

20.114 Draft — 30 September 1993

20.115 Final — 31 December 1993

G3 Power Modeling Studies

Evalutation of the impact of changes in the operations of Glen Canyon Dam on power resources.
Principal Investigators: Michael Roluti, Power Resource Committee

20.116 Draft — 30 June 1993

20.117 Final — 30 September 1993

H. Hopi Tribe

Cultural Resource Studies in the Grand Canyon

H1 ***Cultural resource inventory of the lower Little Colorado River.***
Principal Investigator: Michael Yeatts

20.118 Draft — 30 September 1994

20.119 Final — 31 December 1994

H2 ***Pisis'vavu: An ethnohistory of Hopi use of the Grand Canyon.***
Principal Investigator: T. J. Ferguson

20.120 Draft — 30 September 1994

20.121 Final — 31 December 1994

H3 ***Hopi Tribe interpretation and use of cultural sites in the Grand Canyon.***
Principal Investigators: Kurt Dongoske, Michael Yeats

20.122 Draft — 30 September 1994

20.123 Final — 31 December 1994

I. Hopi Tribe

Hydrology Study of the Little Colorado River

I ***Assessment of the historic hydrology and water quality of the Little Colorado River.***
Principal Investigator: Ron Morgan

20.124 Draft — 30 September 1993

20.125 Final — 31 December 1993

J. Hualapai Tribe

Cultural Resource Studies in the Grand Canyon

J ***Evaluation of the ethnohistory of the Hualapai Tribe's use of the Grand Canyon.***
Principal Investigator: Loretta Jackson

20.126 Draft — 31 December 1992

20.127 Revision — 11 January 1993

20.128 Final — 31 March 1993

K. Hualapai Tribe

Recreation Studies

K ***Evaluation of the effects of Glen Canyon Dam operations on the Hualapai Tribe's recreation use of the lower Grand Canyon.***
Principal Investigator: Laura Duncan

20.129 Draft — 30 June 1993

20.130 Final — 30 September 1993

K1 ***Monitoring of attraction sites and crowding in the lower Grand Canyon.***
Principal Investigators: Brice Hoskin/Amis Holm (SWCA)

20.131 Draft Annual Report — October 1993

K2 ***Evaluation of recreational use patterns on tribal sediment resources in the lower Grand Canyon.***
Principal Investigators: Brice Hoskin/Amis Holm (SWCA)

20.132 Draft Annual Report — October 1993

K3 20.133 ***Economic evaluation.***
Principal Investigator: SWCA

L. Hualapai Tribe

Fisheries Study

L ***Evaluation of the effects of Glen Canyon Dam operations on the fishery in the lower Grand Canyon.***
Principal Investigator: Richard Valdez

20.134 Draft — 30 September 1994

20.135 Final — 31 December 1994

M. Hualapai Tribe

Riparian Study

M ***Monitoring and evaluating the impacts of Glen Canyon Dam interim flows on riparian communities in the lower Grand Canyon.***
Principal Investigators: Brice Hoskin, Amis Holm

20.136 Annual — 31 January 1993

20.137 Annual — 31 January 1994

20.138 Draft — 30 September 1994

20.139 Final — 31 December 1994

N. Navajo Nation

Cultural Resources Study

N1 ***A cultural resources inventory of the lower Little Colorado River and Grand Canyon.***

N2 ***An evaluation of the ethnohistorical use of the Grand Canyon by the Navajo Nation.***
Principal Investigators: Alexis Roberts, Richard Begay

20.140 Draft — 30 September 1993

20.141 Final — 31 December 1993

O. Navajo Nation

Little Colorado River Endangered Fish Study

O ***The development of a literature data base and geographic evaluation of the Little Colorado River basin.***
Principal Investigator: Michael Tremble

20.142 Draft — 30 September 1993

20.143 Final — 31 December 1993

P. National Park Service, Grand Canyon National Park

Aquatic Productivity Studies

P1 ***The effects of Glen Canyon Dam on the aquatic food base in the Colorado River corridor in Grand Canyon, Arizona.***
Principal Investigators: Dean Blinn, Joseph Shannon, Lawrence Stevens

20.144 Draft — 31 October 1992

20.145 Final — 31 December 1992

P2 Riparian Studies

Impacts of Glen Canyon Dam on riparian vegetation and soil stability in the Colorado River corridor, Grand Canyon National Park, Arizona.
Principal Investigators: Lawrence Stevens, Tina Ayers

20.146 Draft — 31 January 1993

20.147 Final — 30 April 1993

P3 Sediment Studies

20.148 ***The influence of variable discharge regimes on Colorado River sand bars below Glen Canyon Dam.***
Principal Investigators: Stanley Beus, Charles Avery

P3(1) 20.149 ***Mechanisms of erosion and a model to predict seepage driven erosion due to transient flow.***
Principal Investigator: Muni Budhu

P3(2) 20.150 ***Beach face erosion in Grand Canyon National Park: A response to ground water seepage during fluctuating flow releases from Glen Canyon Dam.***
Principal Investigators: William Werrell, Rick Inglis, Larry Martin

P3(3) 20.151 ***Daily responses of Colorado River sand bars to Glen Canyon Dam test flows, Grand Canyon, Arizona.***
Principal Investigators: Brian Cluer, Lee Dexter

P3(4) 20.152 ***Analysis of sand bar response along the Colorado River in Glen and Grand Canyons to test flows from Glen Canyon Dam using aerial photography.***
Principal Investigator: Brian Cluer

P3(5) 20.153 ***Historic changes in sediment deposits in Grand Canyon 1965-1990.***
Principal Investigators: Jack Schidt, J. Clark, E. Kyle, P. Grams

P3(6) 20.154 ***Colorado River sand budget: Lee's Ferry to Little Colorado River including Marble Canyon.***
Principal Investigators: Gary Smillie, William L. Jackson, D. Tucker

P3(7) ***The influence of variable discharge regimes on Colorado River sand bars below Glen Canyon Dam, Arizona.***
Principal Investigators: Stanley Beus, Charles Avery, Lawrence Stevens, Matt Kaplinski, Hilary Mayes, Brian Cluer

20.155 Draft — 31 October 1992

20.156 Final — 31 January 1993

P4 Cultural Resource Studies

An inventory of the cultural resources of the Grand Canyon, Arizona.
Principal Investigators: Helen C. Fairley, Peter W. Bungart, Christopher M. Coder, Jim Huffman, Terry L. Samples, Janet R. Balsom

20.157 Draft — 31 December 1992

20.158 Final — 31 March 1993

P5 Bald Eagle Report

Influences of Glen Canyon Dam fluctuating flows on spawning rainbow trout and wintering bald eagles, with observations on the effects of human-bald eagle interactions on the Colorado River in Grand Canyon National Park, Arizona.
Principal Investigators: Linn Montgomery, Charles van Riper III, Bryan Brown, William Leibfried

20.159 Draft — 31 December 1992

20.160 Final — 31 March 1993

P6 **Nutrient Cycling**

Influence on geochemical processes on nutrient spiralling within the recirculation zones of the Colorado River in the Grand Canyon.
Principal Investigators: Rod Parnell, Jeff Bennett

20.161 Draft — 30 April 1995

20.162 Final — 1 July 1995

P7 **Historic Vegetation Changes**

Evaluation of the current and historical riparian vegetation trends in Grand Canyon using multitemporal remote sensing analyses at the Geographic Information System long-term monitoring study sites.
Principal Investigator: Gwen Waring

20.163 Draft — 30 September 1994

20.164 Final — 31 December 1994

P8 **Fluvial Marsh Study**

Effects of interim flows from Glen Canyon Dam on riparian vegetation along the dam regulated Colorado River in Grand Canyon, Arizona.
Principal Investigators: Lawrence Stevens, Tina Ayers

20.165 Draft — 1 October 1994

20.166 Final — 1 January 1995

P9 **Paleoflood Study**

A 4500-year record of large floods on the Colorado River in the Grand Canyon, Arizona.
Principal Investigators: Jim E. O’Connor, Lisa L. Ely Ellen E. Wohl, Lawrence E. Stevens, Theodore S. Melis, Vishwas S. Kale, Victor R. Baker

20.167 Draft — 31 January 1993

20.168 Final — 30 April 1993

P10 **Recreation Study**

Effects of the operation of Glen Canyon Dam on campsite size in the Grand Canyon, Arizona.
Principal Investigators: Lisa Kearsley, Kathy Warren

20.169 Draft — 30 April 1993

20.170 Final — 30 August 1993

P11 Evaluation of Daily Beach Changes

An evaluation of the effects of the interim flows from Glen Canyon Dam on the daily change of beach area in Grand Canyon, Arizona.
Principal Investigators: Brian Cluer, Lee Dexter

20.171 Draft — 30 June 1994

20.172 Final — 30 September 1994

P12 Evaluation of Aerial Photography of Sediment Deposits

An evaluation of the annual effects of the interim flows from Glen Canyon Dam on the sediment deposits in the Grand Canyon, Arizona.
Principal Investigator: Brian Cluer

20.173 Draft — 31 March 1994

20.174 Final — 28 June 1994

P13 Eddy Dynamics

Evaluation of the effects of interim flows on the deposition of sediment in eddies in the Grand Canyon, Arizona.
Principal Investigator: Brian Cluer

20.175 Draft — 31 January 1995

20.176 Final — 30 April 1995

P14 Waterfowl Study

An evaluation of the effects of the operations of Glen Canyon Dam on the waterfowl resources in the Grand Canyon, Arizona.
Principal Investigators: Lawrence Stevens, Natasha Kline

20.177 Draft — 30 April 1995 (21 October 1991)

20.178 Final — 30 August 1995 (31 October 1993)

P15 Willow Flycatcher Survey

Southwestern willow flycatcher surveys along the Colorado River in Grand Canyon National Park and Glen Canyon National Recreation Area, 1992.
Principal Investigators: Mark Sogge, Timothy Tibbitts

20.179 Draft — 7 December 1992 (draft ?)

20.180 Final —

P16 **Lower Trophic Level Study**

Interim flow effects on lower aquatic trophic levels in the Colorado River in Grand Canyon, Arizona.
Principal Investigators: Lawrence Stevens, Dean Blinn

20.181 Draft — 1 October 1994

20.182 Final — 1 January 1995

P17 **Avifaunal Monitoring**

Avifaunal monitoring during the interim flows, including the southwestern willow flycatcher, the bald eagle, AND obligate riparian avifauna.
Principal Investigator: Mark Sogge

20.183 Draft — 1 October 1994

20.184 Final — 1 January 1995

P18 **Recreation Monitoring**

Monitoring the effects of interim flows from Glen Canyon Dam on sand bar dynamics and campsite size in the Colorado River corridor, Grand Canyon National Park, Arizona.
Principal Investigators: Stanley Beus, Matt A. Kaplinski, Joseph E. Hazel, Linda A. Tedrow, Lisa H. Kearsley

20.185 Quarterly Reports

20.186 Annual Reports

20.187 Draft — 1 October 1994

20.188 Final — 1 January 1995

Q. National Park Service, Glen Canyon National Recreation Area

Q1 **Water Quality Study**

An evaluation of the effects of interim flow operations on the water quality of the Colorado River from Glen Canyon Dam to Lee's Ferry, Arizona.
Principal Investigators: Clive Pinnock, C. Wood, D. Tinker

20.189 Draft — 30 June 1993

20.190 Final — 30 September 1993

Q2 **Waterfowl Study**

An evaluation of the effects of interim flow operations on the waterfowl in the Colorado River from Glen Canyon Dam to Lee's Ferry, Arizona.
Principal Investigators: Clive Pinnock, C. Wood

20.191 Draft — 30 June 1993

20.192 Final — 30 September 1993

Q3 **Cultural Resource Report**

An evaluation of the effects of the operations of Glen Canyon Dam on the cultural resources from Glen Canyon Dam to Lee's Ferry.
Principal Investigators: Christine Kincaid, Tim W. Burchett

20.193 Draft —

20.194 Final —

Q4 **Paiute Ethnographic Report**

An ethnographic evaluation of the use of the Grand Canyon, Arizona by the Paiute tribes of Arizona and Utah.
Principal Investigators: Richard W. Stouffle, David B. Halmo, Michael J. Evans, Diane E. Austin

20.195 1st preliminary draft — 24 June 1993

20.196 2nd preliminary draft — 15 July 1993

20.197 Draft —

20.198 Final —

Q5 **Marsh Study**

Effects of the interim flows from Glen Canyon Dam on the fluvial marshes of the lower Glen Canyon, Arizona.
Principal Investigators: Lawrence Stevens, Tina Ayers

20.199 Draft — 31 January 1993

20.200 Final — 30 April 1993

R. Northern Arizona University

Trout Spawning Study

R ***Impact of fluctuating water levels on early life history of rainbow trout.***
Principal Investigators: W. Linn Montgomery, Kirsten Tinning

20.201 Draft — 28 February 1993 (3 August 1993)

20.202 Final — 31 May 1993

S. Northern Arizona University

Humpback Chub Literature Review

S ***Synthesis of information on humpback chub,* Gila cypha*, in the Colorado River basin.***
Principal Investigators: Linn Montgomery, Charles Minckley

20.203 Draft — 31 July 1993

20.204 Final — 31 October 1993

T. Glen Canyon Environmental Studies

T1 Light Attenuation Study

Photosynthetically available radiation (PAR) in the Colorado River, Glen and Grand Canyon, Arizona.
Principal Investigator: Michael Yard

20.205 Draft — 11 January 1993

20.206 Final — 31 August 1993

T2 Historical Review of Lake Powell Water Quality

Evaluation of the historic high water quality trends in Lake Powell, Arizona and Utah: A review of the available data.
Principal Investigator: William Vernieu

20.207 Draft — 28 June 1994

20.208 Final — 30 September 1994

T3 Native Fish Report

Non-native fishes of the Grand Canyon, Arizona: A review with regards to their effects upon native fish.
Principal Investigator: Allen Haden

20.209 Draft — 18 November 1992

20.210 Final — 31 January 1993

T4 Backwaters Evaluation

The relationship between flow and backwater fish habitat of the Colorado River in Grand Canyon, Arizona.
Principal Investigator: Judy Weiss

20.211 Draft — 13 August 1993

20.212 Final — 30 September 1993

U. University of Arizona

U Beach Deformation Study

Monitoring of sand bar instabililty during the interim flows: a seepage erosion approach.
Principal Investigators: Muni Budhu, Roger Gobin

20.213 Draft — 30 September 1994

20.214 Final — 31 December 1994

V. Utah State University

V ***Development of a monitoring program of sediment storage changes in alluvial banks and bars, Colorado River, Grand Canyon, Arizona.***

THE GRAND CANON

A WORLDWIDE BIBLIOGRAPHY OF THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS
IN THE UNITED STATES AND MEXICO

21

GEOLOGY AND PALEONTOLOGY OF THE GRAND CANYON REGION

**Earth sciences of the Grand Canyon region,
including extralimital studies of the continuity of Grand Canyon strata,
regional structure and tectonics, regional groundwater hydrology, and the
geological evolution of the Colorado River**

GO TO VOLUME CONTENTS PAGE
GO TO BIBLIOGRAPHY TABLE OF CONTENTS

PART 21. GEOLOGY AND PALEONTOLOGY OF THE GRAND CANYON REGION

OVERVIEW. This part includes works about the geology and paleontology of the Grand Canyon (including hydrogeology of tributaries to the Colorado River, but excluding the hydrogeologic regime of the Colorado River), studies of Grand Canyon rock units *and their stratigraphic continuity beyond the canyon-proper*, studies of the structure and tectonics of southwestern North America where also embracing the Grand Canyon region, investigations of the evolution of the Grand Canyon and the Colorado River (including studies extralimital to the scope this bibliography), studies of Mesozoic strata in the immediate Grand Canyon area, modern-groundwater studies of the region, and general reports on topographic and geologic mapping in the region. Some works relating to the geological aspects of physical geography are also included here, as also are items that relate to the Grand Canyon (or Grand Canyon-like) computerized terrain models. Documents pertaining to the experiences of geological field work in this region are included in this part. Items that relate to the geochemistry of surface and ground waters including springs are cited in Part 18 (PHYSICAL ENVIRONMENT).

See THE GRAND CANON **Volume 2, CARTOBIBLIOGRAPHY OF THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS, for guides to topographical quadrangles of the U.S. Geological Survey in the Grand Canyon region.**

RELATED MATERIAL

PART 3. *THE NEW YORK TIMES* for additional items that relate to this part of the bibliography (which are not repeated in this part)

PART 6. YOUTH for pertinent items that relate to this part of the bibliography

PART 11, SECTION 2. LOWER COLORADO—GEOLOGY for geological and hydrological works about the lower Colorado River region, Lake Mead, Arizona-Nevada, to the Colorado River delta in Mexico. See also Part 11, Section 2 for all citations that pertain to the Peach Springs Tuff (explained in Notes, below)

PART 13. ADMINISTRATION AND MANAGEMENT for material relating to activist concerns over uranium mining in the Grand Canyon region

PART 17. NATIVE AMERICANS for material relating to Native Amerians' concerns over uranium mining in the Grand Canyon region

PART 18. PHYSICAL ENVIRONMENT for material relating specifically to water-quality studies of surface and ground waters

PART 22. HYDRAULICS AND HYDROGEOLOGY OF THE COLORADO RIVER for materials relating to the hydrogeologic regime of the Colorado River through the Grand Canyon

PART 23 . GEOLOGICAL FIELD GUIDES for specialized geological guides to the Grand Canyon and Colorado River

PART 24. GEOLOGIC MAPS for all geologic maps within the Grand Canyon region [these are also cited in THE GRAND CANON Volume 2 (Cartobibliography)]

NOTES FOR PART 21

THIS part comprises references to the geology (broadly speaking) of the Grand Canyon region. It includes regional studies that embrace the Grand Canyon, plus material that examines the stratigraphic continuity of the Grand Canyon's formations. Noticeable among these citations are those that pertain to areas outside of the geographical coverage of the main body of THE GRAND CANON (see map). These extralimital references are important for their focus on correlative stratigraphic and sedimentological analyses that, in turn, reflect upon studies in the Grand Canyon. This is akin to examining the meteorological or climatological aspects of the greater Southwest (as in Part 18 PHYSICAL ENVIRONMENT) since they pertain to effects observed also in the Grand Canyon. Part 21 further includes broad studies of the geologic history of the Colorado River basin, inasmuch as these studies all pertain in some measure to the Grand Canyon and, in turn, the history of the river in the lower Colorado River region. Including these extralimital materials does not greatly inflate the number of citations in this part of the bibliography.

A separate *Bibliography of Paleontology of the Grand Canyon Region and in the Stratigraphic Continuity of Grand Canyon Formations* was compiled from THE GRAND CANON in 2019 to commemorate the centennial of Grand Canyon National Park and National Fossil Day 2019. It is accessible online at https://ravensperch.org/bibliography-of-paleontology-of-the-grand-canyon-region/ and it is occasionally updated online. Culling these paleontology citations from THE GRAND CANON was an opportunistic effort, not originally a part of the main bibliography. (A paleontological bibliography for material that limits itself only to, or includes data from, Grand Canyon National Park alone would be a labor-intensive effort requiring page-by-page examinations of many of the citations here, and more.) The publications listed in the separate paleontology bibliography are those that have obvious reference to paleontology. There are many more citations that might have been added, particularly those that relate to broad stratigraphic, sedimentological, and paleogeological studies, which by implication should also contain references to fossils; and similarly, texts that embrace the general geology of the Grand Canyon that should include detailed or superficial commentaries on fossils. However, without a wholesale revisit to all of these publications it is not clear which among such titles do contain paleontological data. Part 21 of THE GRAND CANON does contain all citations that relate to the earth sciences for the greater Grand Canyon region.

Part 21 includes numerous extended abstracts of the works by Clarence E. Dutton, most notably his 1882 *Tertiary History of the Grand Cañon District*. While they were essentially reviews of recently published items, they are in fact lengthy extracts, sometimes with editorial notes. For this reason they usually appear in this part rather than in Part 30 (REVIEWS AND

Many items pertaining to the U.S. Geological Survey expedition (Birdseye Expedition) of 1923 on the Colorado River through Grand Canyon will be found in Part 2 (GENERAL PUBLICATIONS). This expedition principally examined potential sites for dams, but quite a lot of general and public interest material was reported from and about this expedition. Only specifically scientific items relating to the geology of the expedition are included in Part 21.

Added to Part 21 are items that pertain to theoretical and practical computerized analyses of data that utilize the Grand Canyon topographic model. These are not mathematical modeling studies of the development of actual topography of the Grand Canyon but are landscape imaging studies using a Grand Canyon terrain model. Because they use a Grand Canyon elevational data set to analyze the relationships of cells or sets of data points in two- and three-dimensional image representations, I include them within the geology subject area for their use of topographical data sets. But inasmuch as the cited publications do not usually pertain to studies of the actual Grand Canyon, nor are they products that pertain to the canyon, they are not considered for THE GRAND CANON's separate section on Computer and Interactive Media.

Many citations from publications produced by the Geological Society of America include references to supplementary material in the Geological Society of America's Data Repository. Originally, this material could be requested by mail application to the society, and in the early 1990s a compilation of Data Repository items was available on microfiche, but today all of it is accessible online at https://www.geosociety.org/datarepository/).

Citations that pertain to the Peach Springs Tuff, named originally for occurrences in northwestern Arizona, are for the sake of bibliographical convenience cited in Part 11, Section 2. The Peach Springs Tuff type locality is near Peach Springs, Mohave County, Arizona, and thus falls more properly into Part 21 of this bibliography. However, the unit has more notably been the subject of detailed studies and correlations throughout the Arizona–Nevada–California region, the tuff source area being identified in the Silver Creek caldera of the southern Black Mountains; a majority of the published work pertains to those correlated occurrences and identification of source area, which occur mostly in the lower Colorado River region.

There are in Part 21 a variety of citations that pertain to material that most geologists and other users will consider to be "fiction"; for example, creationist perspectives of geology and paleontology, the so-called "Electric Universe Theory" that posits massive extraterrestrially sourced electrical charges as a cause of earth topography, and fanciful, off-the-cuff explanations of the formation of Grand Canyon. Regardless, all of these still are "geological" in nature and, even those that are purely fanciful, are not purposely "fiction" (at least in the minds of their authors).

Publications that relate to creationist and young-earth perspectives of Grand Canyon geology are included in this part with the understanding that this is an ongoing, sometmes tempetuous, field of study that brings ideas of faith up against the tenets and methodologies of empirical and falsifiable science. Accordingly, some users of this bibliography may object to including creationist research with the science-based works of geology. However, these are topically identical so they are not segregated. To assist researchers looking for contrasting perspectives, both for and against creationist-held views embracing the Grand Canyon, these citations are denoted with Item numbers in *colored italics* (for example, *21.6300*).[86]

This section of the bibliography contains a great deal of taxonomic nomenclature of fossil organisms; the so-called binomial nomenclature of genera and species (*Genus species*, in italics) and capitalized proper names of higher taxonomic groups (like phyla, classes, and families, not italicized). Although a citation will be exactly as printed, in notes that may follow it I have taken the opportunity to clarify some of the nomenclatural conventions that may not be intuitive to those who do not practice in these fields. I have indicated as best as I have been able the newly introduced taxa in a publication that come from localities within the geographic embrace of this bibliography. To disambiguate variant usages, in the notes that I append to some citations I use spelled-out phrases to bring attention to these new taxa. For example, "new species" is used instead of the nomenclaturally more conventional "n. sp.", "nov. sp.", "sp. n." or "sp. nov." (which in any case are synonymous terms); likewise for "new genus", "new ichnospecies", or any similar usage with a taxonomic name. In this fashion, too, one may find in this bibliography all such cited occurrences simply by searching for the spelled-out "new species" (etc.). The conventional forms do also appear when they are a part of a title or a quotation.

Omitted from Part 21 are items that pertain to the San Francisco volcanic field. Although this area may be considered together with regional volcanism, such as that of the western Grand Canyon, I have considered the literature on the San Francisco Peaks too great for an area only of the most marginal interest to the Grand Canyon and Colorado River.

Although I have included studies of the stratigraphic continuity of the canyon's formations, I have left out discussions that relate to the canyon's upper Paleozoic strata where they occur at Meteor Crater, east of Flagstaff, Arizona, because these discussions pertain to impact effects rather than to stratigraphic or sedimentological relationships.

---

[86] *Colored italics* are used for aesthetic and pragmatic reasons; color to stand out more on the page, italics in the event that a page in this bibliography is reproduced without the benefit of color.

["Further information, says the Salt Lake *Herald*, of March 12th, has been received relative to the new gold diggings. The first discovery was made at the mouth of the Rio Virgin by a party of miners from Arizona. The party divided, three going to St. George to look out a route for obtaining supplies, and eighteen following the bed of the river prospecting. They traced the gold up the river to the Kanabwash [*sic*], where they discovered the gold coming from Buckskin Mountain region with the wash. There they went to work and are making from $10 to $18 a day. The extent of the placers is said to be about 24 miles. Large numbers of miners are passing through St. George on their way to the new diggings." (ENTIRE ITEM)]

1905 21.5451 Mineral possibilities of the Pacific coast. *Our Paper* (Massachusetts Reformatory, Concord Junction), 21(45) (November 11): 718. ["Asbestos is being developed in the Grand Canyon of the Colorado." (ENTIRE NOTE)]

1905 21.5095 Geologic expression in contour maps. *In:* Geographical Record [SECTION]. *American Geographical Society of New York, Bulletin*, 37(2): 107. [Abstract of presentation by Nelson Horatio Darton to Association of American Geographers, Philadelphia.]

1906 21.5685 Kanab [NEWS]. *Deseret News*, (January 13): 3 [issue pagination]. ["Messrs. W. M. Whipple and A. Hodgert are in from their mining claims near Grand Canyon. They report about two and one-half feet of snow on the Buckskin mountains [Kaibab Plateau]. Some good copper claims have been located by these gentlemen and improvements are being made on same." (ENTIRE ITEM)]

1906 21.5686 An option given. Grand Gulch copper mine secured by Butte and eastern parties. *Deseret News*, (January 18): 10 [issue pagination].

1906 21.5687 More evidence. *Deseret News*, (February 13): 4 [issue pagination]. [A correspondent in Delta, Colorado, cites "a volume by Lieut. Williamson" concerning "a survey on the Pacific coast in the early fifties." Williamson claims evidence that "the Columbia river once ran south through California, and emptied into the Gulf of California" and that prior to the elevation of the Sierra Nevadas "tradewinds from the Pacific swept its vapors far east . . . forming lakes and rivers. [. . .] Probably at the time of this great eruption [of the Sierras] the great canyon of the Colorado River was rent open and made such a wonderful change in the face of nature." The article concludes that such evidence corroborates the "brief historical record" of these events contained in the Book of Mormon.]

1906 21.6465 The use of asbestos as a material of construction. *Mining Reporter* (Denver) (Denver), 53(14) (April 5): 340. [Notes: "Nearly all of the asbestos mined in the United States is obtained near New Hartford, Connecticut, Sall Mountain, Georgia, Bedford county, Virginia, Dalton, Massachusetts, and in the Grand canon, Arizona. On account of the quantity of asbestos exposed and its quality the latter deposits are unusually attractive." (ENTIRE NOTE)]

1906 21.6635 Map of Bright Angel quadrangle, Arizona. *The Mining World* (Chicago), 25(2) (July 14): 32-33. [Regarding the U.S. Geological Survey topographic sheet by F. E. Matthes.]

1906 21.7037 Map of the Bright Angel quadrangle, Grand Canyon of the Colorado River, Arizona. *Mineral Wealth* (Redding, California), 8(9) (July 15): 4-5. [Regarding the U.S. Geological Survey topographic sheet by F. E. Matthes.]

Bagley, James W.

1917 21.4930 The use of the panoramic camera in topographic surveying; with notes on the application of photogrammetry to aerial surveys. *U.S. Geological Survey, Bulletin 657*. ["The Grand Canyon of the Colorado is a field so tedious to survey with the plane table, so extensive in length, in relief, and in wealth of features, that it alone, in the writer's opinion, would justify the employment of the camera in its topographic survey." (p. 10) (ENTIRE NOTE)]

Bahadori, Alireza; Holt, William E.; AND Rasbury, E. Troy

2019 21.7921 The history and mechanisms for lithospheric geodynamic evolution of the [*sic*] southwestern North America since Late Eocene [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 51(5): Paper No. 160-10 (https://gsa.confex.com/gsa/2019AM/meetingapp.cgi/Paper/339671).

Bahadori, Alireza; Holt, William E.; Rasbury, E. Troy; Loughney, Katharine M.; AND Badgley, Catherine

2020 21.8135 A 4-D geodynamic model of the lithosphere: the coupled influence of tectonics and surface processes on crustal deformation, basin development, and drainage evolution in southwestern North America since the Late Eocene [ABSTRACT]. *In: American Geophysical Union, Fall Meeting, Online Everywhere, 1-17 December 2020*, EP028-0002. [*NOTE*: The 2020 AGU Fall Meeting was moved to an all-virtual presence online due to the COVID-19 pandemic, with abstracts accessible through https://agu.confex.com/agu/fm20/meetingapp.cgi.]

2021 21.8343 Lithosphere dynamics drive uplift of the Colorado Plateau and incision of the Grand Canyon in southwestern North America [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 53(6): Abstract 34-3, doi:10.1130/abs/2021AM-367607.
